The site is bordered by farmland, a school playing field and residential areas. The site is not publicly accessible. Boundaries are mainly hedges and fencing.</p>	Y

	Is there any evidence, or is it likely that other wildlife of interest has been found on the site? Are there ancient hedgerows, woodland, veteran trees on the site?  <i>If yes, please provide details below</i>  There is evidence of longstanding riparian woodland here as evidenced by RAF aerial photographs from 1946-49. Ordnance Survey mapping also indicates a proportion of this area was scrub as far back as the first edition 25 inch map of the 1880s. Uncultivated vegetation is therefore apparent at this site over an extended period.	Y
<b>6</b>	<b>Evidence of Local Support and Alternate Green Space Provision</b> - Is there sufficient current evidence of Local Support?	Y
	<i>If yes, please provide details below</i>  This site is not publicly accessible. Landowner consultation has demonstrated support for this allocation.	Y
<b>7</b>	<b>Could the site help to mitigate against the effects of climate change on the local community?</b> Does the site have sufficient landscape qualities that could help tackle climate change?	Y

	<p><i>If yes, please provide details below</i></p> <p>Trees and rough vegetation in riparian locations are important for water storage and slowing the flow of water into rivers. This site there contributes to flood mitigation. The site is completely wooded with trees being a vital carbon sink. Trees next to watercourses also provide shading, with climate induced heat impacts being a problem for river fauna.</p>	Y
8	<p><b>Does the site include any landscape features that could help build resilience to climate change challenges?</b> Does the site have sufficient landscape features that could build resilience to climate change?</p>	Y
