

# Pool Provision Tavistock/ West Devon

## From Swim England

In summary current provision within the district is at a good level, attainment rates are high and with participation high the demand for swimming is matched. Ageing stock is a concern and a replacement strategy should be considered within any future provision.

**Subject:** RE: Tavistock Neighbourhood Plan

Hi Ursula

Please see a summary from our Head of Facilities below:

- Tavistock sits within West Devon which currently has an adequate level of water space compared to the population.
- However, 50% of its pool stock is at risk of closure due to its age and we would support any proposals to replace ageing provision.
- Attainment rates for children are above national average
- Adult Participation is above national average

In summary current provision within the district is at a good level, attainment rates are high and with participation high the demand for swimming is matched. Ageing stock is a concern and a replacement strategy should be considered within any future provision.

Hope this helps.

Kind regards
